

**GENERAL NOTES:**

1. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
2. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
3. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
4. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
5. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
6. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
7. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
8. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
9. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
10. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.

If a seal size larger than that indicated on the plans is used, the movement range, the depth of curb and all dimensions for the other details shall be shown on the shop drawings. The bent plate shall be fabricated in one solid piece except for the joint sealant system. The bent plate shall be fabricated in one solid piece except for the joint sealant system.
